

	<ul style="list-style-type: none"> <li>● Improves water penetration and enhances soil aeration</li> <li>● Formulated especially for gardens, flower beds, orchards, septic site beds and lawns.</li> </ul>
	<b>SPEC LABEL</b>

Perk is a commercial anionic liquid additive.

## *DIRECTIONS FOR USE*

Apply Perk soil treatment to the entire area, both high and low spots.

### *APPLICATION RATE*

Mix 8-10 ounces of Perk with water to cover uniformly 1 acre (43,560 sq. ft.). The amount of water to be mixed with Perk will vary with the type of spraying equipment used.

### *APPLICATION TIME*

Perk can be applied anytime; however for best results Perk should be applied 2-3 times per growing season -- spring, summer, and fall.

### *APPLICATION METHOD*

Perk may be applied by any conventional spraying method.

### *COMPATIBILITY*

Perk is believed to be compatible with most liquid fertilizers, insecticides, and fungicides. A compatibility test should be conducted prior to mixing in the spray tank.

### *INGREDIENTS*

Active Ingredient:

Ammonium Laureth Sulfate .....	48%
Inert Ingredients.....	52%
